-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to selectively routing telephone calls to a computer network **via either a modem or a network interface**, classified in class 370, subclass 352.
 - II. Claims 20-26, drawn to facilitating a telephone connection over a computer network **based on querying a database and selecting an ITSP based on the querying**, classified in class 370, subclass 352.
 - III. Claim 27, drawn to selectively routing a call over a computer network by **comparing the area code to a database and routing based on toll or non-toll calls**, classified in class 379, subclass 221.02.
2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II and III have separate utility such as to facilitating a telephone connection over a computer network based on querying a database and selecting an ITSP based on the querying as opposed to selectively routing a call over a computer network by comparing the area code to a database and routing based on toll or non-toll calls. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2665

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, and is not required for Group III, restriction for examination purposes as indicated is proper.
